SUMMARY

A vocational high school graduate with a major in Software Engineering who is dedicated to building a professional career in web development. I have experience building Software as a Service (SaaS) platforms. I specialize in React.js and Next.js, with expertise in database integration, APIs, authentication, performance optimization, and testing to minimize bugs. Adaptable to AI technology trends to enhance development efficiency and committed to maintaining clean code to facilitate team collaboration and support long-term feature development.

WORK EXPERIENCE

Quality Assurance (QA) Engineer Intern Internship	January 2025 – June 2025 PT Jalin Mayantara Indonesia
- Ensured software quality over a 6-month period through intensive testing of the company's attendance website and AI chatbot platform. - Compiled comprehensive test reports and tracked bugs to maintain system stability. - Conducted regular feature validation to ensure all application functions met business requirements and user experience (UX) standards.
